1001 NR Amsterdam

#### Description

2 WIRES handsfree audio internal unit for wall mounted or table installation.

It has 2 physical keys for the control of the main functions – answer and end a call – and has 3 touch keys for the control of the main functions – door lock release, staircase light control and entrance panel activation/scrolling – there are further 4 configurable touch keys that perform different functions – e.g. intercom, additional door lock activation, generic activations.

The device has a side joystick to adjust the call tone volume and a call exclusion notification LED.

The installation can be made to the wall using the bracket (supplied) or using table support to be purchased separately.

The device also has Professional Studio (Office) function and must be physically configured.

#### **Related items**

344692 Tabletop support

#### **Technical data**

Power supply:18 - 27 VdcStand by absorption:8.5 mAMax. absorption:55 mA maxMaximum cable section for each clamp: $2 \times 1$  mm²Operating temperature:5 - 40 °C

**Dimensional data** 

#### Legend

When pressed, the keys light up and emit a "beep" (that can be deactivated by procedure).

- 1. Communication enabling key
- Green LED flashing: incoming call
- 2. Staircase light touch key
- 3. Programmable touch keys \*
- 4. Loudspeaker
- 5. Bell exclusion notification LED
- Red LED flashing: bell excluded
- 6. Joystick for adjustments and programming
- 7. Entrance panel/scrolling activation touch key
- 8. Communication disabling key
- Red LED flashing: call in progress 9. Microphone
- 10. Tactile guides for the blinds
- 11. Door lock release touch key \*
- White LED flashing: active Professional Studio (Office) function
- \* If the LEDs flash white when pressed, the "safe door lock" function is active and the key is deactivated.

ST-00000470-EN 29/0

29/04/2019

#### Legend

- 1. Clamps for the connection of an external call to the floor pushbutton  $\neg \neg \neg$
- 2. Additional bell connection clamps (1 5M).
- The connection must be point point on the clamps of the additional bells
- 3. 2 wires SCS BUS connection clamps

- 4. Line termination ON / OFF micro-switch  $ON = \square$
- 5. ON / OFF micro-switch for "safe door lock" function  $ON = \Box$

To activate the function with device not powered

6. Configurator socket

#### Configuration

#### The device must be only physically configured.

#### N - internal unit number

The configurators connected to the N sockets of the device assign an identification number within the system to each handset. The internal units must be configured in progressive order. The internal units must be configured in progressive order. The internal units with parallel connection (max 3 are allowed inside apartments without item 346850) must be configured using the same N configurator. In parallel with the main internal unit, additional audio and video internal units may be installed.

#### P - entrance panel association

The configurators connected to the P sockets of the device identify the associated EP, which is the first entrance panel that switches itself on when the pushbutton is pressed the first time, as well as which door lock is activated when pressing the door lock pushbutton while the handset is idle.

#### M - operating mode

The configurators connected to the M socket of the device assign the operating modes to the 4 programmable keys (•, ••, ••, ••) based on the following indications. They can also enable special functions.

#### **Device settings**

#### **Ringtone volume adjustment**

Note: for the adjustment of the volume, the S=0 EP ringtone is always played back

#### Speaker volume adjustment

During the call, move the joystick up/down to select the speaker volume level (1 - 8). After selecting the desired level release the joystick. **Note:** Speaker volume adjustment is only possible if the internal unit and the entrance panel are connected.

#### Associate a ringtone to an event

Ringtone selection from the MAIN ENTRANCE PANEL (S = 0)

ST-00000470-EN

344282

To complete the setup, press the joystick or wait for the timeout.

EXIT

Note: The ringtones played for calls from EP configured with S=2 & S=3 are set by default and cannot be changed.

#### Key sound enable/disable

With the basic configuration, when keys are pressed a BEEP is emitted. This function may be disabled/enabled as follows.

#### To DISABLE the key sound

From stand-by

Press and hold down the right Connection key and press the staircase light key.

#### To ENABLE the key sound

From stand-by

Press and hold down the right Connection key and press the staircase light key.

#### **OFFICE function**

When a call is received from the entrance panel, this function automatically activates the associated door lock without the need for pressing the door lock control key. To enable this function, Classe100 must be configured as shown in the "Configuration / Special functions" section. Moreover, the function must be enabled as follows.

#### **Enabling the function**

From stand-by

Press and hold down the right Connection key and then press the Staircase key

#### **Disabling the function**

From stand-by

Press and hold down the right Connection key and then press the Staircase key

Note: It cannot be activated together with the Safe Door Lock and the Door Status function.

The door lock LED starts flashing white

The door lock LED is OFF

#### **DOOR STATUS function**

This function notifies the status of the Door lock. If open the "LED Door lock" flashes, and if closed, the LED stays off. Warning: the function can only be activated if required by the system - accessory devices are required. Note: It cannot be activated together with the Professional Studio (Office) function.

11

#### **PAGING function**

This function can be used to send voice messages using the microphone of the Classe 100 through the speakers of the sound system. To enable this function, Classe100 must be configured as shown in the "Configuration / Special functions" section.

#### Function use

From stand-by

#### **SAFE DOOR LOCK function**

When active, this function prevents the opening of the entrance panel door lock when the internal unit is in stand-by. Therefore, the opening of the door lock is only permitted when entrance panel and internal unit are in voice communication.

#### **Enabling the function**

Move the corresponding microswitch to ON

**Note:** when the function is active, all the keys in all the configurations requiring the activation of a door lock are disabled, and when they are pressed the white LED flashes. **Note:** It cannot be activated together with the Professional Studio (Office) function.
